Portfolio: wleklinski.eu

Passionate TypeScript Developer experienced in building SEO-friendly websites and developing integrated design systems. Keen on enhancing applications with complex TypeScript functionalities. Strong analytical background, holding a degree in Applied Physics.

Skills

- Making SEO-friendly websites with Next.js
- Creating design systems
- Leveraging design tools such as Figma
- Building complex types and type transformations with TypeScript
- Testing the code
- Knowledge of Functional Programming Paradigm

Experience

September 2022 - PRESENT

VirtusLab, Kraków - Junior Typescript Developer

- Co-creating a design system with React-Figma integration
- Implementing and maintaining npm packages
- Creating and maintaining marketing landing pages with Next.js and Strapi CMS
- Writing documentation (including Storybook stories) and tests with Vitest
- Managing a group of developers on a given task

May 2022 - September 2022

VirtusLab, Kraków - Intern Frontend Developer

- Adding features to a fin-tech application in TypeScript, React (with CoffeeScript as legacy)
- Managing complex Redux structure
- Pixel-perfect implementation of a design
- Writing tests using Cypress and Jest, creating Storybook stories
- Communicating with a client

Education

October 2019 - February 2023

AGH University of Cracow - Applied Physics (BSE)

During my studies, I finished several programming courses, including C, C++, and Python. I acquired invaluable technical knowledge (physics, maths, statistics), which helped me become a better problem solver. I was a member of the **AGH SolarPlane** students' organization, where I could sharpen my programming and web development skills.
